

Vehicle Wheelstop Range

Cost & performance perfectly balanced

Features & Benefits

- Our UK manufactured wheelstop range is a radical step forward in design & performance
- Utilised to provide a positive stop for vehicles using parking bays
- This solid moulded rubber wheelstop will not bend or deform and will withstand aggressive daily vehicle movements
- A range of heights will suit all vehicles from HGV to LGV including the growing demand for double decker trailers & combination vehicles
- The HGV/HLGV wheelstop incorporates a design feature that will allow the trailer to be 'pulled back over the wheelstop' in the unlikely event the trailer should override the parking position
- A truly innovative product that balances cost, performance & long life perfectly

Technical Specification

- Manufactured from 95% recycled truck tyres in the UK
- 50mm reflective yellow stripe moulded in for pedestrian & vehicle visibility
- Suitable for concrete or tarmac installation

Options

- HGV Wheelstop - 150mm High x 1000mm Long
- HLGV Wheelstop - 110mm High x 1000mm Long
- CAR Wheelstop - 80mm High x 1000mm Long
