

Block Stack Solutions

1

Block-Stack storage environments require more durable identification systems due to their often harsh environments - our solutions are varied in practicality to suit individual requirements.

2

We offer a wide range of block-stack identification solutions including floor location labels, embedded floor labels and tags, hanging signs and barcodes, stanchions, bus-stop signs and self-adhesive floor labels.

As a specialist in warehouse identification, we design and produce products in house for customers with specific block-stack storage requirements and provide standard items for general use. Our barcode location labels, floor labels, retro reflective barcode labels and signage are developed to help improve productivity and identification in storage facilities.

With a simple design they require a low spec installation method, reducing time and essentially overall cost while being an effective solution. Alpha, numeric, alphanumeric and barcode information can be applied resulting in an effective warehouse block stack identification solution.

3

1. Self-adhesive floor labels

Self-adhesive floor location labels are the most common form of block-stack and bay location identification. Low cost and now with our latest adhesives they are a more durable solution.

2. Durable floor mounted label

Our durable floor label is extremely robust as it is secured to the floor complete with metal surround and protective transparent cover.

4

3. Floor-embedded labels & tags

Floor-embedded labels and tags provide a highly-durable means of accommodating barcode labels in the floor, lying flush helps reduce wear and damage while improving the lifespan of the bar code labels and their scan verification properties.

4. Hanging or Wall-mounted signs

Hanging or Wall Mounted signs are produced in-house offering a block stack solution with long-range scanning capabilities and an eye readable location marker as a low maintenance fix and forget solution.

5

5. Bus Stop or Stanchion signs

Bus Stop or Stanchions signs are a flexible alternative to block stack warehouse identification both indoor and out. The stanchion method allows for frequent re-allocation and temporary allocation of storage locations.

6. Painted Floor Stencils

Stencils can be painted to the floor, but to get greater durability we advise preparing the floor beforehand either by shot blasting or diamond shaving.

“ Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, by offering clients a quality-driven, total solution via multi-channel procurement methods. ”

Tony Gresty | Managing Director – ASG Services

Labelling and Safety Solutions

About us

At ASG Services we have gained an excellent reputation for providing the most appropriate labelling and safety products to meet the specific requirements of our customers.

By providing a range of products in each of our specialist fields we are able to provide the optimum solution for every client from one source.

From our beginning over fifteen years ago we have been constantly developing our products and services.

We have a considerable depth of knowledge in all labelling and industrial floor marking and painting systems specific to the warehousing and distribution industries.

Our success in developing line marking to provide personnel segregation systems, is complemented by our other safety solutions which include internal security mesh, safety signage, plus barrier and column protection.

Our unique product and service offering is very attractive to companies looking to satisfy all their needs from a single source.
