

PROTECTION | TRAFFIC/PEDESTRIAN SAFETY

Warehouse Mirrors

Warehouses can be dangerous places with lots of blindspots and unseen hazards, potentially putting stock and personnel at serious risk. Eliminate these hazards by improving your vision with our range of warehouse mirrors. An effective and cost-efficient risk reduction solution, these can be positioned at strategic locations to enhance your all-round vision and remove blindspots for safe navigation of the warehouse. Useful for operators of MHE/static machinery, as well as pedestrians working in high traffic areas with fast-moving goods.

Hemispheric Sphere Safety Mirrors

Whether you need a large ceiling-secured 360° panoramic view or a ¼ sphere wide-angle mirror, rest assured, we have the right option for you. All our mirrors provide enhanced views of aisles, junction, entrances and doorways to stop accidents before they happen.

Framed Internal and External Safety Mirrors

Highly visual frames featuring safety hashing help to indicate a hazard and enhance safety in the most problematic areas of any facility. Red and white-framed external mirrors in rectangular or circular configurations promote safer movement in external industrial sites and loading bays. Our internal signs feature yellow and black frames and help traffic in warehouses, storage facilities and industrial sites to move safely and securely.

Forklift Truck Mirror

Improve the truck operator's rear vision and help avoid collisions between the forklift truck and other vehicles or pedestrians. Comes complete with attachments for easy fitting to any forklift truck.

Bespoke Multi-Purpose and Harsh Condition Mirrors

Do you have a process or area where only a bespoke solution will satisfy safety/inspection requirements? Talk to us, we can supply a wide variety of sizes, colours, strengths and capability of mirrors adapted to suit the environment and purpose required.
